ABOUT ME

A chemistry graduate transitioning into AI/ML and data analytics, skilled in leveraging data to extract insights, identify trends, and build predictive models. Experienced in applying scientific problem-solving, statistical analysis, and machine learning techniques to convert raw data into impactful, data-driven solutions that support informed decision-making.

EDUCATION

2022 - 2025

St Aloysius College

BSc Chemistry

A three year undergraduate program focusing on organic, inorganic, physical, and analytical chemistry with practical laboratory training.

2025 - 2026

SDC – Pudukad

AI & ML - Jr Telecom Data Analyst

The course covers data collection, cleaning, analysis, visualization, and machine learning techniques using tools such as Python to generate data-driven insights.

SKILLS

- Python
- Data Analysis
- Pandas
- NumPy
- Chemistry Knowledge
- Communication
- Machine Learning

PROJECTS

AI Career Recommendation System

An AI Career Recommendation System using Streamlit and machine learning to suggest careers based on user skills and interests.

Chemical Reaction Predictor

A machine learning-based chemical reaction predictor to analyze reaction data and predict outcomes from reactants.

Periodic Table Data Analysis using Python

Analyzed Periodic Table data of 118 elements using Python, Pandas, and Matplotlib to identify atomic mass trends and element category distributions.

CERTIFICATES

Industrial Visit

ATEES info media Pvt Ltd (5 hours)

On The Job Training

ATEES info media Pvt Ltd (80 hours)
